THOMPSON HARZOLAT

SOFTWARE DEVELOPER · CREATIVE TECHNOLOGIST · DESIGNER

08104740876 · tomiwaazeez019@gmail.com

BUILDING AT THE INTERSECTION OF CODE, DESIGN & IDEAS.

Thompson Harzolat is a software developer and creative technologist focused on turning ideas into useful digital experiences. The work spans web development, software projects, AI-assisted development, visual design, digital product thinking, and technical education.

CORE IDENTITY

Builder / Designer / Developer

FOCUS

Web · Software · AI · UI/Visual · Creative Technology

APPROACH

Minimal. Experimental. Practical. Precise.

CAPABILITY PROFILE

01 SOFTWARE DEVELOPMENT
Building functional applications, structured workflows, and practical digital systems.

02 WEB DEVELOPMENT
React/TypeScript interfaces, responsive web experiences, routing, catalog and application flows.

03 AI-ASSISTED DEVELOPMENT
Prompt management, AI-assisted coding, rapid prototyping, experimentation and vibe-coding workflows.

04 DESIGN & VISUAL THINKING
Graphic design, UI direction, visual systems, brand concepts and creative digital presentation.

05 TECHNICAL EDUCATION
Teaching upcoming web developers through practical explanations, implementation and troubleshooting.

06 CREATIVE TECHNOLOGY
Combining technology and design to create distinctive, contemporary digital experiences.

PROFESSIONAL EXPERIENCE

ASSISTANT TUTOR — SOFTWARE DEVELOPMENT

AUG 25 – DEC 25, 2025

720 Degree Innovation Hub

- Taught aspiring web developers through practical software-development sessions.
  - Broke down web-development concepts into understandable, implementation-focused lessons.
  - Guided learners through debugging, troubleshooting and hands-on problem solving.
  - Supported an environment focused on building practical development skills.

SELECTED TECHNOLOGY

FRONTEND	React · TypeScript · HTML · CSS · Vite
DATA / BACKEND	Firebase · Firestore · database-backed application workflows
DEVELOPMENT	JavaScript/TypeScript ecosystem · application architecture · debugging
AI WORKFLOW	AI prompt management · AI-assisted coding · vibe coding · rapid prototyping
DESIGN	Graphic design · UI/visual direction · digital presentation · brand concepts

THOMPSON HARZOLAT

SELECTED WORK / DIGITAL PRODUCT & CREATIVE TECHNOLOGY

SELECTED PROJECTS

01 VIRTUAL LEARNING PLATFORM

LEAD DEVELOPER

REACT · TYPESCRIPT

A virtual learning application designed to connect learners and educators visually over the internet for lectures.

- Led the development direction from concept toward a functional web experience.
- Worked with React and TypeScript to structure the application interface and learning experience.
- Focused on making remote learning interaction clearer, more visual and practical.

02 LUMORA

WEB APP / PRODUCT BUILD

REACT · TYPESCRIPT · FIREBASE

A professional creative fashion-brand web application designed around clothing, materials, collections and customer inquiries.

- Designed and built catalog experiences for clothing, materials, collections and product details.
- Developed inquiry flows for product requests and custom sewing requests.
- Worked with Firebase/Firestore for products, materials, collections, inquiries, contact submissions, users and settings.
- Applied a bold editorial visual direction using warm neutrals, strong typography and responsive layouts.
- Implemented structured routes including shop, product, material and collection experiences.

03 STUDENT / LECTURER MANAGEMENT SYSTEM

FULL-STACK ACADEMIC PROJECT

DATABASE · AUTH · WEB APP

An academic management application centered on authenticated student and lecturer accounts and administrative record management.

- Designed the system around real account-specific profile information rather than static dashboard placeholders.
- Worked on backend/database setup and safe administrative creation of student and lecturer records.
- Focused on practical data flows, account context and usable dashboard experiences.

04 PULSELAB

COMMUNITY + PORTFOLIO CONCEPT

CREATIVE TECHNOLOGY

A personal software-development portfolio and community concept designed to bring together technical work, creative experimentation and a broader developer ecosystem.

- Direction combines animation, minimalism, creative interaction and professional presentation.
- Positions the portfolio as an expression of both technical capability and creative identity.
- Built around the idea of software development as a craft rather than a collection of generic templates.

CREATIVE / DESIGN DIRECTION

DESIGN MINDSET

Minimal but expressive. Contemporary rather than futuristic. Sleek without becoming generic. The design direction favors controlled creativity, strong visual hierarchy, unexpected concepts, and systems that remain useful after the visual novelty wears off.

AREAS OF PRACTICE

- Graphic design & visual concepts
- UI / web visual direction
- Brand identity exploration
- Creative digital experiences
- AI-assisted visual experimentation
- Portfolio and product presentation

THOMPSON HARZOLAT

EDUCATION / DEVELOPMENT PRACTICE / PROFESSIONAL PROFILE

EDUCATION

NATIONAL DIPLOMA (ND), COMPUTER SCIENCE

EXPECTED 2026

Federal Polytechnic Ilaro

Current level: 200 level. Academic focus aligned with software development, computing and practical technology.

WEST AFRICAN SENIOR SCHOOL CERTIFICATE EXAMINATION

COMPLETED

Baptist Boys' High School

Selected results: English C5 · Mathematics C6 · Physics C6 · Chemistry B3 · Biology B3

CERTIFICATION

GRAPHIC DESIGN CERTIFICATE

2020

Ashrolink Computer Institute

Formal training supporting the visual-design side of a broader software and creative-technology practice.

WORKING PHILOSOPHY

“Build things that are technically solid, visually intentional, and distinct enough to be remembered.”

01 **LEARN BY BUILDING**
Projects are used as a practical way to learn new technologies, workflows and problem-solving patterns.

02 **DESIGN WITH PURPOSE**
Visual decisions should improve communication and experience, not exist only for decoration.

03 **USE AI AS A TOOL**
AI-assisted development is treated as an accelerator for ideation, implementation and iteration—not a substitute for technical understanding.

04 **KEEP EXPERIMENTING**
Creative technology is approached through prototypes, unusual concepts and deliberate experimentation.

PROFESSIONAL SERVICES / CAPABILITIES

• Website and web-application development	• Software-development project implementation	• React / TypeScript interface development
• AI-assisted coding and prompt management	• Graphic and visual design	• UI / digital product visual direction
• Creative portfolio and brand experiences	• Technical tutoring and developer guidance	• ICT and practical technical support

PUBLIC CREATIVE PRESENCE

A public Behance search under the Thompson Harzolat name surfaces a creative project titled **“A Creative Mockup Collection”**, providing an additional public-facing connection between the name and visual-design work. ■cite■turn0search0■turn0search1■
